

6.4 –Production Under Permit by the Railroad Commission of Texas

An owner or operator of a water well used in coordination with activities authorized by a permit issued by the Railroad Commission of Texas, including but not limited to oil or gas exploration and production activities is required to report annual groundwater withdrawals in acre-feet or U.S. gallons on forms provided by the District within 15 days of December 31 of each year. The first full year of required reported use for permitted wells is for 2010, to be submitted by February 1, 2011. The first full year of required reported use for registered wells is 2013, to be submitted by February 1, 2014. Reported groundwater usage may be based only on flow meter records from a District approved flow meter.

The rule above requires installation of a Panhandle Groundwater Conservation District (PGCD) approved flow meter on a water well drilled to supply water for an oil and gas well. The water production from this water well shall be reported annually to PGCD on this form. The reporting deadlines are listed above in Rule 6.4.

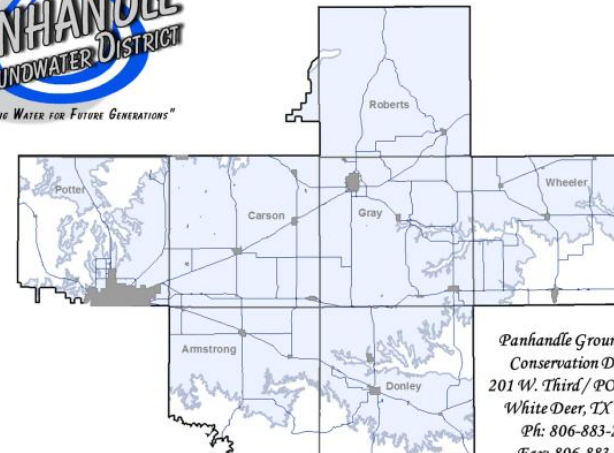

Please indicate by date: (1) if the water well was plugged or (2) if the water well was given to the landowner.
***(If water well was plugged, please enclose plugging report with this completed form)**

Please indicate with a check mark: If rig supply water well is still being used by Oil and Gas Operator
***(One (1) of the first three (3) blank boxes should either have a date or a check mark)**

Please put number of acre-feet or gallons used from this water well during the calendar year:
(1) In “Used in the District” column and/or (2) In “Transported Out of the District” column.

Last column: (1) to be used for comments and/or
(2) If this rig supply water well was given to the landowner, please list landowner’s Name and Address in last column.

This Form is to Report Groundwater Production from Water Wells used in Oil and Gas Exploration and Production within and from the Panhandle Groundwater Conservation District Boundaries. The Map to the Right Shows the District Boundaries. Call 806-883-2501 With Any Questions.
